FORMATION

2021	IUT SAINT-ÉTIENNE - UNIVERSITÉ JEAN MONNET <i>Bachelor of Engineering in Electrical and Industrial Computing</i> Relevant coursework: Industrial automation, C/C++ programming, C# programming, Electrical engineering, Embedded systems, Industrial networks, Electrical diagram design	St-Etienne, France
Jan 2021	LYCÉE DES CATALINS <i>Baccalauréat STI2D (Science and Technology of Industry and Sustainable Development)</i> Fairly Good Relevant coursework: Industrial technology, English, Spanish	Montelimar, France

EXPÉRIENCES PROFESSIONNELLES

Sep 2023 12 months	BT TECHNOLOGIES <i>Automation Engineering Apprentice</i> - Developed human-machine interfaces (HMI) for industrial systems using Machine Expert programming - Created electrical diagrams compliant with client specifications (analyzed technical requirements) - Programmed Siemens and Schneider PLCs using TIA Portal and Control Expert, developed control logic	France
Apr 2023 3 months	BT TECHNOLOGIES <i>Automation Engineering Intern</i> - Designed and tested industrial electrical cabinets in collaboration with the technical team (developed plans, wired) - Retrofitted existing electrical and automation systems (analyzed current installations, modernized obsolete components) - Participated in technical project review meetings, presented progress, resolved technical issues	France
2022 10 months	ROBOTICS CLUB - UNIVERSITÉ JEAN MONNET <i>Active Member - Robotics Expertise</i> - Collaborated with research and development teams to design autonomous robots (contributed expertise in embedded programm... - Developed and fabricated robotic prototypes (selected electronic components, programmed microcontrollers)	St-Etienne, France

LANGUES & COMPÉTENCES

- Language:** French (native), English (intermediate, B1), Spanish (basic, A2)
- IT:** C++ (Visual Studio), C# (Visual Studio), TIA Portal (Siemens), Control Expert (Schneider), Machine Expert, AutoCAD

ACTIVITÉS & CENTRES D'INTÉRÊT

- International travel (1 month in Japan, 7-month Asia tour - cultural immersion, discovery of local industrial technologies, development of adaptability and autonomy)
- Robotics and embedded technologies (technology watch on automation innovations, participation in specialized forums, personal programming projects)
- Event management and sales (on-field sales experience, development of interpersonal skills, adaptation to diverse audiences)
