Attention: Recruitment Department

Dear Hiring Manager,

As a graduate of HEC Paris with concrete M&A experience, I am eager to join Goldman Sachs as an Investment Banking Analyst within your M&A division. Having contributed to the execution of a €450M pharmaceutical transaction at Rothschild & Co, I am drawn to Goldman's leadership in complex cross-border deals and its demand for analytical excellence. My expertise in financial modeling and proficiency in three languages position me to contribute immediately to your deal teams.

During my internship at Rothschild & Co, I participated in the execution of a €450M pharmaceutical M&A transaction, performing financial modeling (DCF, LBO) and due diligence across 8 European markets. I optimized the comparable analysis process, reducing preparation time by 30%, which allowed senior bankers to accelerate client presentations. I also prepared pitch books for C-suite executives, contributing to 3 mandates totaling €1.2B.

As Portfolio Manager of the HEC Investment Club, I demonstrated my leadership and analytical rigor by leading a team of 5 analysts managing a €2M fund. By applying rigorous DCF methodologies to French mid-caps, we generated a 22% annualized return versus 15% for the CAC 40. Concurrently, as President of the HEC Finance Society, I organized 12 industry panels with Goldman Sachs and other institutions, attracting 500+ participants, which further strengthened my understanding of the profession's demands.

Goldman Sachs' meritocratic culture and its intellectually rigorous approach to strategic transactions align perfectly with my mathematical background (Polytechnique) and professional aspirations. Interactions with your analysts during HEC events have confirmed that Goldman offers the ideal environment to develop expertise in cross-border M&A.

I would welcome the opportunity to discuss how my M&A experience can contribute to the success of Goldman Sachs. Thank you for your consideration.

Sincerely, Fayed HANAFI

Fayed HANAFI
