REQUIREMENTS

1. If you're ordering for a business, what's your industry? (Optional)

Not answered

2. Is this order part of a bigger project you're working on? (Optional)

Not answered

3. Do you have a web hosting provider for this project? (Optional)

Not answered

4. Provide any logos, branding guidelines, or design preferences

N/A
Some information is shown in English language. [Translate](#)

5. Clearly define the app's purpose, target audience, and key features

Food truck vendors/customers discovery & scaling

6. List essential features like login, payments, or notifications

N/A
Some information is shown in English language. [Tranalate](#)

7. Ensure access to necessary APIs or backend systems for integrations

clarification I would like to include regarding backend integrations.

For the vendor document verification process, I would like the system to support OCR (Optical Character Recognition) for scanning and reading uploaded documents such as Business Licenses, Health Permits, Insurance certificates, and Government IDs.

The goal is for the system to be able to automatically detect and extract key information from these documents when they are uploaded. For example:

• Document name/type

• Vendor name

• Issuing authority

• Expiration date

This will help automate parts of the verification process and allow the system to store expiration dates so we can implement document expiration monitoring and reminder notifications.

If possible, please ensure the backend architecture supports OCR integration through a suitable API (for example Google Vision, AWS Textract, or a similar service) so that the system can scan uploaded documents and extract relevant fields.

This will help improve verification accuracy and reduce manual review effort as the platform grows.

8. Specify whether the app is for iOS, Android, or both

Both

9. Share Figma design or wireframes for UI UX layout (If Any)

N/A
